Do either of you see  
any need to respond to this  
letter which came by certified  
mail today? It does raise  
a question re: past Academy  
activities.

How Kooky can they get!

Certainly it is not NAS's part to do  
his detective work. I personally have no information  
on who was funded to work on "synthetic agents"  
— I certainly was eager to forefeed that kind of  
technology race. He can get everything about  
Detrick's program via FOI.
